One Year Leaders Club Income Potential Sponsoring Only 5 People A Month With An Average of 100 PV.

How about a realistic example for a change?

We know you've seen lot's of income examples. Here's how this one is different...

First, it doesn't assume unrealistic duplication (example: 5 who get 5...). Why? Because this never happens in real life.

Second, it accounts for attrition over time. Why? Because in the real world people die and people quit.

Third, it's based on real world organizations and natural growth. Why? Because we know you live in the real world and want to know what to expect from a real business!
